

Sustainable Development Management Solutions

What can we do for you?

Sustainable Development Management Solutions (SDMS) was established to provide clients with support in actioning their sustainability efforts, provide strategic management solutions and implementation planning. It strives to achieve goals through innovative approaches. Its areas of intervention include the Green Economy, Natural Resource Management, Climate Change and Sustainable Energy & Transport.

CONSULTING

Strategic Management

We support organizations with their management needs to ensure maximum benefits for their investment. We do so by helping them adopt a change management approach that strategically uses their resources, in combination with those of partners, to produce results and impact at the lowest possible financial and environmental costs. We can manage big budget projects for you by establishing a dedicated Project Management Unit (PMU) for your project within our organization, and we can also manage smaller budget projects on a part-time basis, saving you costs on a full-time dedicated PMU.

Actioning Sustainability Efforts

People everywhere are demanding greater environmental and social responsibility from their governments and businesses alike. We help entities become greener and more sustainable in a way that is responsive to today's needs without impacting long-term profitability. And while we're managing your sustainability initiatives, you can continue focusing on your core business.

Implementation Planning

We provide support to projects to help them overcome any difficulties they may face in any part of the project cycle. With many years of project management experience, we can help you overcome hurdles you may encounter. We can also manage the programme/project for you, allowing you to focus on other parts of your business.

PROJECT MANAGEMENT SUPPORT

SDMS has developed a number of project concepts tailored for the needs of Pacific island countries and other developing countries. These include:

Project Name	Target	Indicative value
Strengthening the Pacific Seaweed Industry	Governments & Private Sector	USD 1 million (initial)

Greening the Islands	Governments	USD 3 million (initial)
Green Audits Project	Governments	USD 2 million
Supporting a Pacific Blue Economy	Governments	USD 2 million
Green Taxation for Reforestation	Solomon Islands Government	USD 1 million
Beqa & Yanuca Blue Lagoon Project	Fiji Government	USD 1.5 million
Greening Our Cities and Towns	City/Town Administrations	USD 1.5 million
Supporting Pacific Private Sector Sustainability	Pacific Private Sector	USD 1 million (initial)

SDMS has developed concept notes for all the above projects. Interested governments and donors are encouraged to [contact us](#) for further details. SDMS would be happy to lead a project document development exercise that meets the expectations of all stakeholders. SDMS also takes the responsibility of managing these projects through a flat 10% management fee for all projects.

IN-COUNTRY REPRESENTATION

SDMS offers representation services to companies and agencies. If your company or agency has development or investment interests in Fiji or the Pacific region, and you have no in-country representation, we are well positioned to perform in-country services on your company/agency’s behalf with a very affordable arrangement. Please [contact us](#) with your needs and we can propose an arrangement suitable for your company or agency.

GREEN INVESTMENT

Our current portfolio of green investment opportunities includes the following:

- Production of Bamboo Biochar and Charcoal
- Green Tractor Hiring Service
- Hemp4Crete
- Seaweed Organic Fertilizer

We are looking for partners to implement these business ventures. [Contact us](#) for more information.
